Stages of establishing and developing a care center for students with disabilities

An introduction:

Assiut University believes in the importance of creating a healthy learning environment for students with disabilities and integrating them with other students. A cooperation protocol was held between Assiut University, AMIDEAST and Helm Foundation for Education, Training and Consultations on August ١٨, ٢٠١٨, with the aim of establishing a formal framework for cooperation in establishing a center for the care of students with disabilities through the grants program in public universities, as part of the Higher Education Initiative to provide high quality of higher education for students Egyptians with disabilities.

The regulation was prepared and approved by the Supreme Council of Universities (a unit of a special nature) after its review and approval by the Special Regulations Committee formed by the decision of the Minister of Finance No. ١٤٥ for the year ٢٠٠٥ on ١٠/٢/٢٠٢٠.

Center vision:

Leadership and distinction in caring for students with disabilities efficiently and effectively to match the services provided in international universities.

Center Mission:

Providing integrated services to all students with disabilities at the university that help them adapt to their university environment and integrate them with normal students, as well as provide programs and activities that help them develop their skills.

General goal:

Enhancing an educational, social, cultural and economic environment for students with disabilities at the university.

Center Objectives:

- ١- Organizing training courses, awareness seminars, workshops and seminars to qualify the workers in the center's fields of work, making them able to communicate with the target groups.
- ٢ - Conducting studies and research related to persons with disabilities in order to determine their needs, improve the services provided to them, and rehabilitate them to participate positively in society.
- ٣- Integrating students with disabilities with their peers from normal students.
- ٤- Follow up the academic achievement of students with disabilities and provide them with a helping hand by providing educational means that motivate them to excel.
- ٥- Supporting students with disabilities mathematically, culturally, technically, socially and technologically, in

coordination and follow-up with the various centers, units and departments inside and outside the university.

University admission policies for students with disabilities

The Supreme Council of Universities decided to approve the application of the rules and conditions for the admission of blind and handicapped Egyptian students holding the Egyptian General Secondary Certificate and the equivalent general secondary certificates from Arab countries to Egyptian universities on the blind and handicapped Egyptian students holding the American high school certificate and exempting them from the requirement to obtain the SAT exam certificate and only a certificate The GPA only, as is the case with blind and handicapped students who have a Saudi secondary school certificate when they are accepted into Egyptian universities with a secondary certificate only without the ability test.

Ministerial Resolution No. (٢٥٥٥) was issued on ١١/٨/٢٠٢٠ regarding the rules and conditions for accepting Egyptian students with disabilities in Egyptian public universities:

- Egyptian students with special needs of all categories are accepted in Egyptian universities and institutes as follows:-

١. Through the Office for Coordination of Admission to Universities and Institutes, in accordance with the announced nomination rules for all categories of students.

Students with special needs of various categories have the right to apply through electronic coordination of practical and theoretical colleges and institutes that accept their certificate (Egyptian general secondary and its equivalent - Egyptian technical certificates) and which are in accordance with the order of their desires and the sum of their grades in the secondary certificate they obtained and pass the abilities test or the personal interview test For some colleges and institutes that require this within the conditions of joining them, in order to achieve the principle of equality and equal opportunities

٢. Through universities directly:-

Egyptian students with motor disabilities, blind or deaf-mute people of all categories, and integration students, are excluded from the condition of the grand total (obtaining a at least ٥٠% in the Egyptian General Secondary Certificate and the equivalent Arab and foreign secondary certificates) and (obtaining at least ٧٠% in the Egyptian technical certificates), when joining some theoretical colleges only, which are as follows:-

- For students with mobility disabilities: - Faculties of Arts - Law - Commerce only, provided that the disability prevents the student from moving or writing lectures except with the help of others.
- For blind students: - Faculties of Arts - Dar Al Uloom - Al-Asun - Law - Social Service only.

- For deaf and dumb students: Faculty (Specific Education and Home Economics) only -

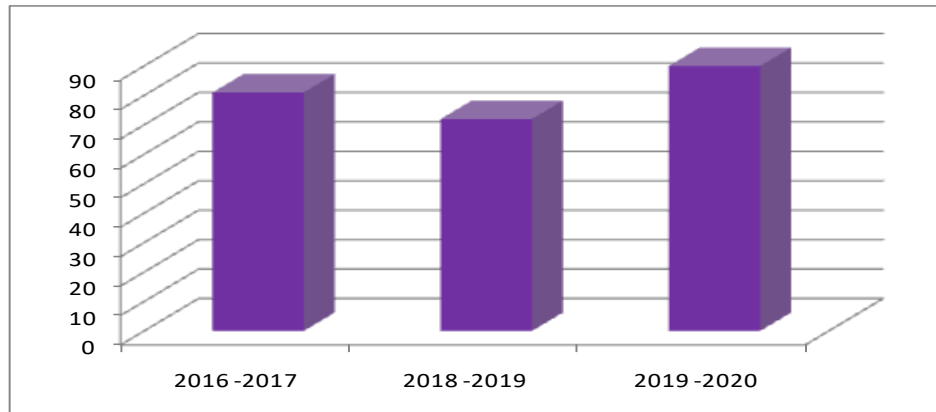

This is all provided that:

- The internal regulations of the college that the student wishes to apply to accept the holders of secondary certificates obtained by these students and the need to complete the eligible courses required for the college.
- This should be done by presenting these students to the central medical committee of the university who is applying to them, which is formed annually by the president of the university and according to the system and dates announced by the universities in this regard.
- Students who have been rejected by the university's medical committee are allowed to submit grievances to the Secretariat of the Supreme Council of Universities for medical re-examination, and they are presented to the Central Medical Committee at Ain Shams University, and the result of this committee is final.
- Egyptian students with disabilities who are admitted to some faculties of Egyptian universities according to this system are not entitled to transfer to other faculties, as they have been accepted with an exception from the aggregate condition and they can only transfer their enrollment to other faculties provided that they meet the minimum announced by the Coordination Office in the year of obtaining the secondary certificate.
