II-INTRODUCTION

A clinical training course forms the main part in internal medicine ward with special stress in all specialties in internal medicine. It includes training in emergency medicine, liver and gastrointestinal diseases, chest diseases, autoimmune and connective tissue diseases, heart diseases, diabetes mellitus and endocrinal diseases, blood diseases, renal diseases, common neurological diseases , infectious diseases and geriatric medicine all through the period of the course. In addition to study the essential course.

The overall aim of this curriculum is to enable the trainee to acquire the skills and knowledge to provide a clinical and laboratory service in internal medicine.

On completion of the educational programmer the trainee will have acquired :

- Participate in Internal medicine Outpatient Clinics
- Be responsible for the day to day management of ward inpatients
- Liaise with colleagues in Medicine and consult with other specialties
- Be exposed to all aspects of internal medicine.
- Present one audit a year and participate in departmental meetings
- The trainee should be guaranteed a minimum of four hours protected time per week to regularly attend the academic meetings within the department.
- An understanding of Internal medicine laboratory practice .
- The diagnostic techniques required in the practice of Internal medicine
- The communication skills required for the practice of clinical Internal medicine. The acquisition of some management skills required in the running of the Internal medicine laboratory .

III-Aim of the activities book

To provide one source of evidence for the assessment committee that you attained the desired level of competency required to gain the award.

In this book you will document all clinical, academic and other experiences and skills you attained during your training.

IV-Sections of the book

For each module / course / rotation

The following sections will be recorded:-

A- Clinical case log

A list with all required cases in the concerned module is recorded together with the minimum number of cases that must get exposed to and level of participation that should be achieved for each type of cases. Also each case should be signed by the trainer.

The minimal rate of attendance is 80%.

B- Procedures / operations log

A list for the required procedure, diagnostic – therapeutic operations and the level of desired performance that should be achieved at the end of the training, level of participation and date and signature of the supervisor.

The minimal rate of attendance is 80%.

C- Rotation / attendance proof

1- Academic activities

All academic activities are documented e.g. lectures, journal clubs, workshops, conferences, services attended. This documentation should include the level of participation (attendance, preparation, presentation etc).

2- Academic achievements

All outcomes that achieved in the following fields are documented:-

- Audit participation
- Research "clinical trial" participation.
- Evidence- based medicine "generation of guidelines" protocols

3- Formative assessment log

This document all types of formative assessment attended e.g.:-

- Mini clinical examination
- Quiz.

First Part

Course 1: Medical statistics

Course 2: Research methodology

Course 3: Medicolegal Aspects and Ethics in Medical Practice and Scientific Research

Course 4: Pathology

Course 5: Physiology

Medical statistics & Research methodology

Medical statistics:

Requirements

- Credit points: 1 credit point
- Minimal rate of attendance 80%

Name of the course	Credit points	Responsible department	Attendance	Practical	Percentage of Achieved points

	0.2		2 hours Ethics in research.	20%
	0.2		2 hours Medical ethics.	20%
	Student signature			Principle coordinator signature

Pathology

Requirements:

(3.5 credit point)

- Minimal rate of attendance 80% of lectures.

Topics

- Liver cirrhosis.
- Peptic ulcer disease
- Glomerulonephritis
- Nephrotic syndrome
- Ischemic heart disease.
- Infective endocarditis.
- Vasculitis.
- Diabetes and its complications.

Name of the course	Credit points	Responsible department	Attendance	Percentage of Achieved points
Pathology	3.5 CP	Pathology Department	35 hours	100%
Pathology	1 CP		10 HOURS • Liver cirrhosis. • Peptic ulcer disease	28.57 %
	1 CP		10 HOURS • Glomerulonephritis • Nephrotic syndrome	28.57 %
	1 CP		10 HOURS • Ischemic heart disease. • Infective endocarditis.	28.57 %
	0.5 CP		5 HOURS • Vasculitis. • Diabetes and its complications.	14.29 %

Physiology

Requirements:

(3.5 credit point)

- Minimal rate of attendance 80% of lectures.

Topics

- Regulation of the heart rate and arterial blood pressure.
- Pulmonary and coronary circulation.
- Mechanism of blood coagulation.
- Regulation of blood glucose.
- Calcium homeostasis
- Gastrointestinal hormones
- Physiology of digestion and absorption
- Urine formation.
- Acid base balance (mechanisms and abnormalities)
- Hormones of the kidney.
- Temperature and its regulation.

Name of the course	Credit points	Responsible department	Attendance	Percentage of Achieved points
Physiology	3.5 CP	Physiology Department	35 hours	100%
Physiology	1 CP		10 hours <ul style="list-style-type: none">Regulation of the heart rate and arterial blood pressure.Pulmonary and coronary circulation.Temperature and its regulation	28.57 %

Year 1 training in internal medicine department

Clinical training	Credit points	Responsible department	Attendance	percentage of Achieved points
Clinical training in internal medicine	23	Internal medicine	Year 1	100%
	8		<ul style="list-style-type: none">➤ Practice with clinical cases for at least 2 month in the department including interpretation of their related laboratory investigation and different radiologic patterns (in CXR and Abdominal CT) and Supervision on the residents for the newly admitted cases➤ Log of cases as mentioned below➤ Procedures log as mentioned below	34.8%
	4		<ul style="list-style-type: none">➤ Night shift (From 2 pm to 8 am) at least 1 night shift /week for 8 week in the department (including supervision on the residents for the newly admitted cases and critical cases) and or (in the endoscopy unit with senior endoscopist for training; in echocardiography unit or plasmapheresis unit).	17.4%
	3		<ul style="list-style-type: none">➤ Attendance of one day/week in the Outpatient clinic (4 hours/day) for at least 16 week.	13%
	4		<ul style="list-style-type: none">➤ Attendance of one day/week in (the ultrasonography; echocardiography or plasmapheresis unit) for at least 20 week for training	17.4%
	4		<ul style="list-style-type: none">➤ Perform (Abdominal US, echocardiography or plasmapheresis) under supervision for at least 2 days per week for 3 month.	17.4%

Second part: Course 6

Internal medicine:

Requirements

- Credit points: 24 credit point for didactic (lectures, seminars, tutorial) during year 2 and year 3 (1.5 credit point out of these 24 for formative assessment - once /year or at least 2 exam during whole period)
- 123 credit point for training (23 credit point during year 1 and 100 credit point during year 2 and year 3) (6 credit point out of these 100 for formative mini clinical exam – at the end of any rotation (3ms) or at least 6 exam during whole period)
- Minimal rate of attendance 80% of didactic and training

This course consist of 9 modules

Module 1 Gastroenterology (12%).

Module 2 Cardiology (12%).

Module 3 Nephrology (12%).

Module 4 Endocrinology (12%).

Module 5 Rheumatology (12%).

Module 6 Haematology (12%).

Module 7 critical care (12%).

Module 8 Neurology (8%).

Module 9 Chest (8%).

General skills	could not judge (0)	strongly disagree(1)	↩ ↪		↩ ↪		↩ ↪		strongly agree (7)
			(2)	(3)	(4)	(5)	(6)		
Demonstrate the competency of continuous evaluation of different types of care provision to patients in the different area of his field.									
Appraise scientific evidence.									
Continuously improve patient care based on constant self-evaluation and <u>life-long learning</u> .									
Participate in clinical audit and research projects.									

General skills	could not judge (0)	strongly disagree(1)	(2)		(3)		(4)		(5)		(6)	strongly agree (7)
Practice skills of evidence-based Medicine (EBM).												
Educate and evaluate students, residents and other health professionals.												
Design logbooks.												
Design clinical guidelines and standard protocols of management.												
Appraise evidence from scientific studies related to the patients' health problems.												
Apply knowledge of study designs and statistical methods to the appraisal of clinical studies.												
Use information technology to manage information, access on- line medical information; for the important topics.												
Master interpersonal and communication skills that result in the effective <u>exchange of information and collaboration</u> with patients, their families, and health professionals, including:- <ul style="list-style-type: none"> • <u>Present</u> a case. • <u>Write</u> a consultation note. • <u>Inform patients</u> of a diagnosis and therapeutic plan Completing and maintaining comprehensive. • Timely and legible <u>medical records</u>. • Teamwork skills. 												

General skills	could not judge (0)	strongly disagree(1)	↻		↻		strongly agree (7)
			(2)	(3)	(4)	(5)	
Create and sustain a therapeutic and ethically sound relationship with patients.
