## الموضوعات

- أدوات الوصول إلى المعلومات
- أساليب البحث عن المعلومات في البيئة الإلكترونية
- اتحاد المكتبات الجامعية المصرية
- المكتبة الرقمية للجامعات المصرية
  - البوابة الإلكترونية
  - قواعد البيانات العالمية
    - قواعد بيانات النصوص الكاملة
    - قواعد البيانات المستخلصات والإستشادات

# الموضوع

اولاً:- أدوات الوصول إلى المعلومات

# أدوات الوصول إلى المعلومات

١. إستخدام أدوات الوصول على الويب

٢. فهرس المكتبات

٣. إستخدام المكتبات الرقمية

# أدوات الوصول إلى المعلومات

## ١- إستخدام أدوات الوصول على الويب

– محركات البحث Google, AltaVista, Alltheweb

– محركات البحث العلمية Google scholar, Google Books

# أدوات الوصول إلى المعلومات

## • محركات البحث

### مميزاتها :

١. المرونة في إستخدام اللغة الطبيعية.
٢. سرعة الحصول على المعلومات.
٣. مجانية لا تحتاج لتكلفة إضافية.

### عيوبها:

١. غير موثوق في دقة المعلومات التي نحصل عليها.
٢. كثرة النتائج المسترجعة.
٣. تعرض النتائج مرتبة تبعاً لسياستها الخاصة بدلاً من عرضها حسب صلتها بموضوع البحث.

# أدوات الوصول إلى المعلومات

## ٢- فهرس المكتبات

- تقدم بيانات ببيوجرافية فقط عن أماكن تواجد مصادر المعلومات.
- تقدم بيانات عامة عن الأوعية ولا تتناول البيانات التفصيلية.

من أمثلتها الفهرس الموحد للمكتبات الجامعية المصرية فهرس مكتبة مصر العامة – فهرس مكتبة الاسكندرية - فهرس مكتبة

الكونجرس

# أدوات الوصول إلى المعلومات

٣- استخدام المكتبات الرقمية

تقدم بيانات تفصيلية ودقيقة عن مصادر المعلومات ، كما تتيح

الوصول إلى النصوص الكاملة لتلك المصادر من مقالات

دوريات وكتب ورسائل جامعية إلكترونية.

# الموضوع

ثانياً :- أساليب البحث عن المعلومات

# أساليب البحث عن المعلومات

١. البحث البسيط : بكلمة واحد او جملة.

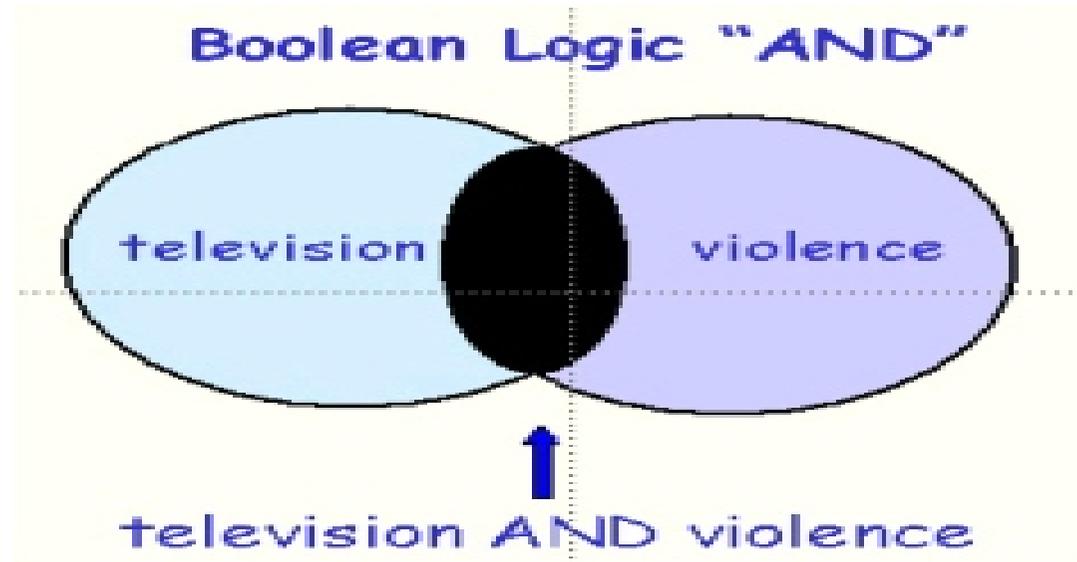

مثال : Libraries

مثال : Academic Libraries in USA

## أساليب البحث عن المعلومات

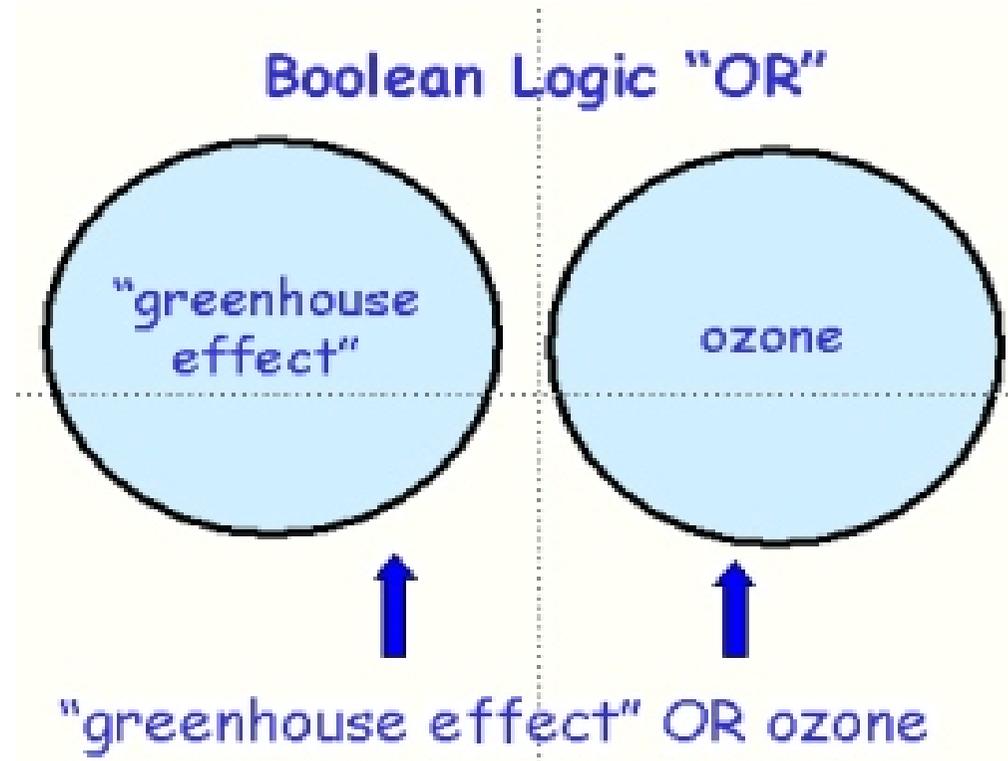

### ٢. البحث المركب (البولييني):

**AND** : يؤدي الرابط AND، الذي يقابل بالعربية حرف العطف "و"، إلى تضيق نطاق البحث لتتحدد نتيجته في النتائج التي تحتوي على سائر الكلمات المفتاحية موضوع البحث

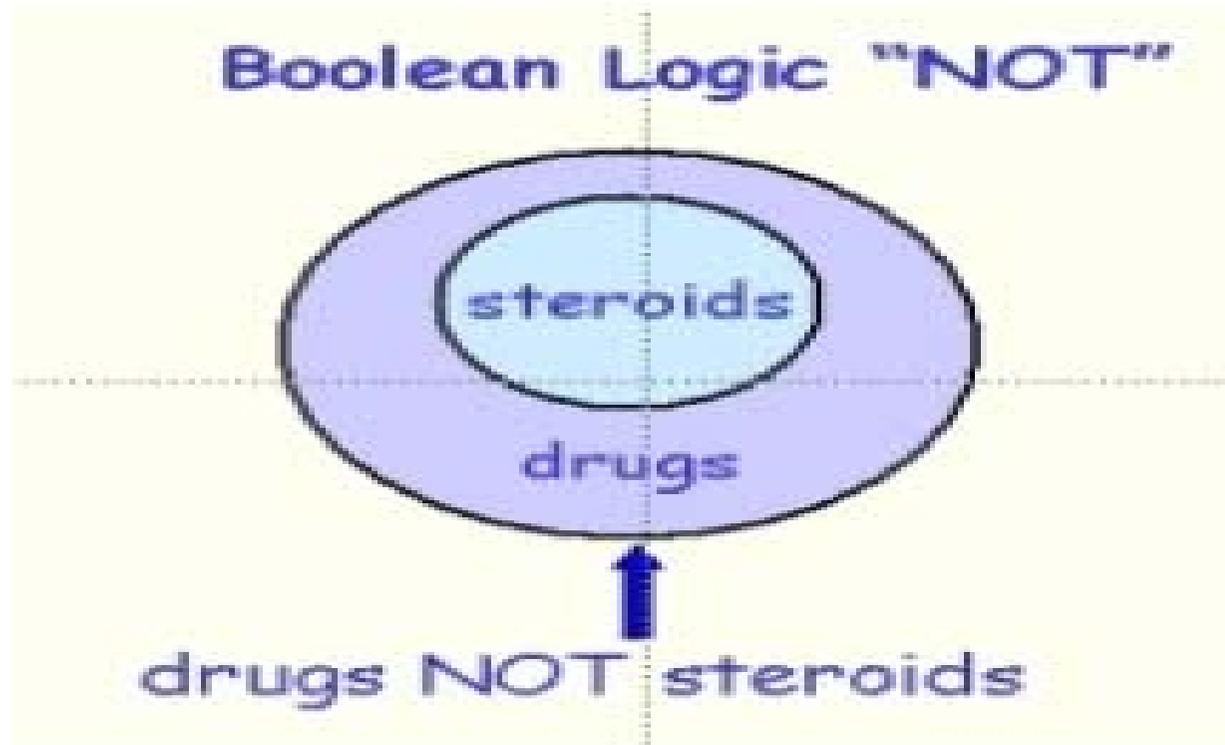

# أساليب البحث عن المعلومات

**OR** : يؤدي استخدام الرابط OR، الذي يقابل في العربية حرف العطف "أو"، إلى توسيع نطاق البحث، لتشمل النتائج التي تحتوي أياً من الكلمات المفتاحية للبحث.

## أساليب البحث عن المعلومات

**NOT:** يستخدم الرابط NOT، الذي يقابل بالعربية "لا" في تضيق نطاق البحث، باستبعاده النتائج التي تحتوي على كلمة أو عبارة معينة.

# أساليب البحث عن المعلومات

## ٣. البحث المعقد

### Fields

وهو اختيار حقل محدد للبحث فيه سواء كان العنوان أو المؤلف أو الموضوع وهكذا.

### Options

وذلك بتضييق خيارات البحث مثل اختيار النص الكامل أو اختيار مصدر معين للبيانات مثلاً.

### Adjust

# الموضوع

ثالثاً :- اتحاد المكتبات الجامعية المصرية

# المؤسسات المشاركة وفي اتحاد الجامعات المصرية

- يشارك في الاتحاد ١٩ جامعة مصرية تحت مظلة المجلس الأعلى للجامعات.
- مجموعة من الجامعات الأجنبية والخاصة .
- مراكز البحوث والمعاهد وغيرها.

# الموضوع

رابعاً:- المكتبة الرقمية للجامعات المصرية

# المكتبة الرقمية للجامعات المصرية

- تشمل المكتبة الرقمية على أكثر من 15 قاعدة بيانات للمستخلصات والاستشهاد المرجعية والنصوص الكاملة للكتب والدوريات والرسائل الجامعية العالمية.
- تتيح المكتبة الرقمية الوصول إلى أكثر من ١٩ ألف دورية إلكترونية وحوالي ٢٧ ألف كتاب بالإضافة إلى أكثر من مليون رسالة علمية أجازتها الجامعات العالمية في أمريكا وأوروبا.

# أنشطة وحدة المكتبة الرقمية

مشروع المكتبة الرقمية

• إتاحة البحث في عدد من قواعد البيانات العالمية النصوص الكاملة والمستخلصات.

مشروع ميكنة مكتبات الجامعات المصرية

• بناء فهرس موحد لمصادر المعلومات المتاحة بالمكتبات الجامعية المصرية.

مشروع المستودع الرقمي للرسائل الجامعية

• قاعدة بيانات مستخلصات للرسائل الجامعية والنصوص الكاملة التي أجازتها الجامعات المصرية.

مشروع النشر الإلكتروني وتكشيف الدوريات العلمية الصادرة عن الجامعات المصرية

• نشر وتكشيف مقالات الدوريات العلمية الصادرة عن الجامعات المصرية بشكل إلكتروني.

مشروع تطوير نظام المستقبل لإدارة المكتبات

• تطوير النظام وفقاً لأحدث المعايير العالمية

# مكونات المكتبة الرقمية

أولاً: البوابة الإلكترونية

ثانياً: مصادر المعلومات الإلكترونية

الكتب الإلكترونية

قواعد البيانات العالمية

أولاً: البوابة الإلكترونية

## Egyptian Universities' Libraries Consortia (EULC)

The major goal of the consortia is to provide interactive information services to the Egyptian scholars and students. All the consortia services are electronically available through the EULC portal. Accessing information resources and services through one unified portal would help the Egyptian universities' libraries to eliminate the overlap and duplication of resources and efforts, which would facilitate optimum methods for effectively and efficiently using the allocated resources

### EULC Projects

- [1. Digital Library Consortia](#) — The main objective of this project is providing access to the international electronic resources including citations, abstracts and full text database, beside E-journals, books, transactions and engineering standards. All these E-resources are searchable through one unified portal and individually through their interfaces.
- [2. Egyptian University Libraries Automation](#) — The objective of this project is automating the Egyptian universities' libraries, (EUL) through building a union catalog for their holdings. The union catalog will facilitate achieving more cooperation and resources sharing among all the members of the EULC.
- [3. Future Library System Development](#) — The ICTC in EL-Mansoura and EL-Zagazig Universities have built and implemented a library automation system. The EULC cooperates with the ICTC to enhance and develop the system using an international list of specifications. The project objective is to standardize the system to cope with the international standards of library automated system and to generalize it in the automation of the EULC.
- [4. The Electronic Theses and Dissertation Database](#) — The objective of this project is building a national database for the awarded theses and dissertation from the Egyptian universities, besides building a task force for the electronic theses and dissertations metadata standard (ETDMS) which would allow the higher education researchers a full submission of their theses to the system using an international electronic standard format.

### Resource of the Month

Evidence-Based Medicine Reviews (EBMR)  
A definitive resource for electronic information in the evidence based medicine (EBM) movement that combines 7 of the most trusted EBM resources into a single, fully-searchable database. EBMR helps clinicians practice EBM through a combination of resources that provide: systematic reviews of topics; article reviews; and access to definitive controlled trials. And only with EBMR on Ovid can you get comprehensive integration with MEDLINE.

Quick Search:

**IGI Global Research Journals (NEW!)**

IGI Global publishes more than 100 peer-reviewed journals in information/computer science and technology applied to business and public administration, engineering, education, medicine and healthcare, and social science. Each IGI Global publication could be utilized by computer science and information technology professionals in keeping up with emerging innovations, technologies, and managerial techniques. This allows them to achieve greater strategic utilization and management of technology in their organizations.

**Search Books@Ovid**

Ovid supports your research needs by combining classic and groundbreaking titles in a wide range of subject areas. Get anytime, anywhere online access to your essential textbooks. And as you link seamlessly between chapters, topics and referenced websites, as you browse the table of contents, Books@Ovid transforms research information into knowledge.

[More about Books@Ovid](#)

**Evidence Based Medicine Reviews (EBMR)**

A definitive resource for electronic information in the evidence based medicine (EBM) movement that combines 7 of the most trusted EBM resources into a single, fully-searchable database.

[More about EBMR](#)

**Nursing@Ovid**

New online Nursing & Allied Health Portal that provides a complete and integrated information source for Nursing Practice, Education, Research, and administration. Simple, easy to use, and built with the architecture of OvidSP.

[More about Nursing@Ovid](#)

**ASCE (NEW!)**

ASCE Journals are the premier source of technical information for the civil engineering profession and form the core collection in the field. 32 journals contains over 48,000 articles, more than 400,000 pages, published since 1990.

[More about Asce Journals](#)

**EMERALD**

EMERALD covers more than 200 international full text journals. All these journals are peer-reviewed and indexed through the web of science database and/or scopus. The database mainly focuses on Management, Business, Economics, Information science, Engineering, social science and Health care.

[More about Sage Journals](#)

**Sage Journals Online**

SAGE publishes more than 560 journals in Business, Humanities, Social Sciences, and Science, Technology and Medicine. SAGE Journals Online is the delivery platform that provides online access to the full text of individual SAGE journals. The SAGE Full-Text Collections, SAGE'S

## ثانياً: مصادر المعلومات الإلكترونية

## الكتب الألكترونية

• تتيح المكتبة الرقمية النصوص الكاملة لعدد كبير من الكتب الإلكترونية في مجالات معرفية مختلفة من خلال مجموعة من ناشري الكتب الإلكترونية على المستوى العالمي. وتتوسع الكتب الإلكترونية المتاحة من خلال المكتبة الرقمية ما بين:

- ١- كتب دراسية تتضمن مجموعة متميزة من المقررات الدراسية التي يتم تدريسها في مجموعة من أكبر الجامعات الأمريكية والأوروبية.
- ٢- مواد مرجعية تشمل موسوعات، كتب حقائق، سلاسل الكتب.
- ٣- كتب متخصصة في مجال العلوم الطبية.

Provide access to over 3 million articles across 1400 journals, this massive collection provide access to researches and articles in medicine, engineering, sciences, social sciences, arts, and humanities which make Wiley Blackwell one of the world's premiere resources for advanced research.  
[More about Wiley Blackwell Interscience](#)

**Proquest**

With more than 2.4 million entries, the ProQuest Dissertations & Theses (PQDT) database is the most comprehensive collection of dissertations and theses in the world. ProQuest's UMI Dissertation Publishing group publishes more than 65,000 new dissertations and theses each year, with weekly updates to the PQDT database. Over 930,000 dissertations and theses are available in PDF format, and most include free twenty-four page previews.  
[More about PQDT](#)

**Springer Link E-Books**

12,000 E books have been added to Springer collection, These new collection of E books have been Published in years 2005-2008.  
[SpringerLink FAQ](#)

**Springer Link Journals**

SpringerLink is one of the world's leading interactive databases for high-quality STM journals, book series, books, reference works and the Online Archives Collection. SpringerLink is a powerful central access point for researchers and scientists. The EULC subscribed in 1622 e-journals & 3500 e-book published in 2007. These materials cover many aspects of human knowledge.  
[SpringerLink FAQ](#)

**Science Direct**

Science Direct, provided by Elsevier, is the world's largest electronic collection of science, technology and medicine full text and bibliographic information. Science Direct covers over 1800 journals and 7 million online articles.  
[More about Science Direct](#)

**EBSCO Academic Search Complete**

Academic Search Complete, designed specifically for academic institutions, is the world's most valuable and comprehensive scholarly, multi-disciplinary full-text database, with more than 5,500 full-text periodicals, including more than 4,600 peer-reviewed journals. In addition to full text, this database offers indexing and abstracts for more than 9,500 journals and a total of nearly 10,000 publications including monographs, reports, conference proceedings, etc. The database features PDF content going back as far as 1865, with the majority of full text titles in native (searchable) PDF format. Searchable cited references are provided for nearly 1,000 journals.  
[More about Academic Search Complete](#)

**Wilson Humanities Abstracts FullText**

The most comprehensive resource available in its field, Humanities Full Text brings you full text plus abstracts and bibliographic indexing of the most noted scholarly sources in the humanities, as well as numerous lesser-known but important specialized magazines. Humanities Abstracts Full Text contains abstracting and indexing coverage for all 500 periodicals included in Humanities Index as well as the full text of over 160 periodicals.  
[Humanities abstracts Database Guide](#)

**Inis (International Nuclear Information System Database)**

Inis contains over 3 million bibliographic records and a unique collection of over 200 000 full-text documents (non-conventional "grey" literature NCL) in 63 languages, including many documents that cannot easily be found anywhere else. INIS represents the world's largest database of scientific and technical literature on a wide range of subjects from nuclear engineering, safeguards and non-proliferation to applications in agriculture, health and industry.  
[About Inis](#)

**Ovid MEDLINE <1996 to Present>**

The world's most comprehensive source of life sciences and biomedical bibliographic information, with nearly eleven million records, provided by the National Library of Medicine.

*Computers and Composition 12, 279–292 (1995)*

## The Evolution of the Computers and Writing Conference

LISA GERRARD

*University of California, Los Angeles*

From its start as an informal meeting at the University of Minnesota in 1982, the yearly conference on computers and writing has remained on the cutting edge of technology and composition pedagogy. In other ways, however, it has changed: Presenters are now more likely to discuss their uses of commercial applications than to demonstrate homemade programs; the focus has shifted from the lone computer user to collaborative uses of technology; instructors are less worried about how the computer will control the user than about how users may manipulate others through technology; the presentations have become increasingly theoretical; the conference has expanded, both materially and in its intellectual scope; recent presentations suggest an increasing self-consciousness about computers and composition studies as a discipline; and the conference reflects the social hierarchy that has developed within this emerging discipline.

---

collaborative pedagogy    composition profession    composition theory  
 computer literacy    computers and writing conference  
 computers and writing history    faculty training    history, computer  
 hypertext    networks    software

---

My connection to the computers and writing conference began by proxy. In 1982, a group of us at UCLA were developing a computer program for student writers called WANDAH.<sup>1</sup> At that time, we were fairly isolated in our work: Little software had been developed for computers and writing, and few people had written on the subject. In October of that year, two of my codevelopers flew to the University of Minnesota to talk about the WANDAH project. They came back full of excitement about the computer projects they'd heard

Journals@Ovid Database Guide

**Search Books@Ovid**

Books@Ovid supports your research needs by combining classic and groundbreaking titles in a wide range of subject areas. Get anytime, anywhere online access to your essential textbooks. And as you link seamlessly between chapters, topics and referenced websites, as you browse the table of contents, Books@Ovid transforms research information into knowledge.

More about Books@Ovid

**EBSCO Academic Search Complete**

Academic Search Complete, designed specifically for academic institutions, is the world's most valuable and comprehensive scholarly, multi-disciplinary full-text database, with more than 5,500 full-text periodicals, including more than 4,600 peer-reviewed journals. In addition to full text, this database offers indexing and abstracts for more than 9,500 journals and a total of nearly 10,000 publications including monographs, reports, conference proceedings, etc. The database features PDF content going back as far as 1865, with the majority of full text titles in native (searchable) PDF format. Searchable cited references are provided for nearly 1,000 journals.

More about Academic Search Complete

**IEEE Xplore**

The IEEE is a leading authority on areas ranging from aerospace systems, computers and telecommunications to biomedical engineering, electric power and consumer electronics among others. Now the IEEE 150 transactions, journals and magazines are available for on-line subscription to all Egyptian Universities libraries (EUL) Users.

IEEE Xplore GUIDE

**Proquest**

With more than 2.4 million entries, the ProQuest Dissertations & Theses (PQDT) database is the most comprehensive collection of dissertations and theses in the world. ProQuest's UMI Dissertation Publishing group publishes more than 65,000 new dissertations and theses each year, with weekly updates to the PQDT database. Over 930,000 dissertations and theses are available in PDF format, and most include free twenty-four page previews.

More about PQDT

**EMERALD**

EMERALD covers more than 200 international full text journals. All these journals are peer-reviewed and indexed through the web of science database and/or scopus. The database mainly focuses on Management, Business, Economics, Information science, Engineering, social science and Health care.

1.  **Wernicke encephalopathy after bariatric surgery: a systematic review. [Review] [97 refs]**

Aasheim ET.  
*Annals of Surgery*. 248(5):714-20, 2008 Nov.  
[Journal Article. Research Support, Non-U.S. Gov't. Review]  
UI: 18948797

Authors Full Name  
Aasheim, Erlend Tuseth.  
[View Abstract](#)

AB OBJECTIVE: To review the clinical essentials of Wernicke encephalopathy (WE) after bariatric surgery. SUMMARY BACKGROUND DATA: An estimated 205,000 bariatric surgical procedures were performed in the United States in 2007. Such procedures may potentially lead to severe nutritional complications. METHODS: Literature searches were performed in Medline, Embase, and abstract collections. Inclusion criteria were WE after bariatric surgery, diagnosed by the presence of two or more of the following signs: mental status changes, eye movement abnormalities, cerebellar dysfunction, and dietary deficiency. RESULTS: Of 104 reported cases of WE after bariatric surgery, 84 cases were included. Gastric bypass or a restrictive procedure had been performed in 80 cases (95%). Admission to hospital for WE occurred within 6 months of surgery in 79 cases (94%). Frequent vomiting was a risk factor in 76 cases (90%) and had lasted for a median of 21 days at admission. Intravenous glucose administration without thiamine was a risk factor in 15 cases (18%). Brain magnetic resonance imaging identified lesions characteristic of WE in 14 of 30 cases (47%). Incomplete recovery was observed in 41 cases (49%); memory deficits and gait difficulties were frequent sequela. The recent increase in the use of bariatric surgery in the United States was associated with an increase in reported WE cases. CONCLUSIONS: The number of WE cases after bariatric surgery is substantially higher than previously reported. Surgeons, allied health providers, and patients need to be aware of the predisposing factors and symptoms to prevent and optimize the management of this condition. [References: 97]

# ISI Web of Knowledge

الاستشهاد المرجعي عنصر مهم وأساسي في عملية البحث العلمي وكتابة البحوث والرسائل الجامعية، حتى أن بعض الجامعات لها أسلوبها الخاص بها في إتباع نشر أبحاثها أو رسائلها في مجلاتها العلمية. والاستشهاد المرجعي له أهمية كبرى للأسباب التالية:-

- توثيق المعلومات والبيانات التي اعتمد عليها الباحث نفسه.
- دعم وتأكيد والاستشهاد بما كتبه الباحث أو انتقاد لما كتبه باحث آخر.
- حفظ حق المؤلفين الآخرين في المعلومات التي استقى منها الباحث هذه المعلومات، وهذا قانون أساسي في أخلاقيات البحث العلمي.
- بيان وتعريف بالمطبوعات والمؤلفات الأصلية التي اخذ منها الباحث.
- إرجاع القارئ إلى المصدر الذي استفاد منه الباحث وذلك من أجل تشجيع القارئ على التأكد أو الاستفادة في المعلومات.

**IGI Global Research Journals (NEW!)**

IGI Global publishes more than 100 peer-reviewed journals in information/computer science and technology applied to business and public administration, engineering, education, medicine and healthcare, and social science. Each IGI Global publication could be utilized by computer science and information technology professionals in keeping up with emerging innovations, technologies, and managerial techniques. This allows them to achieve greater strategic utilization and management of technology in their organizations.

## Citation Mapping Setup for Literature Record

[Citation Mapping Help](#) | [Close Citation Map](#)

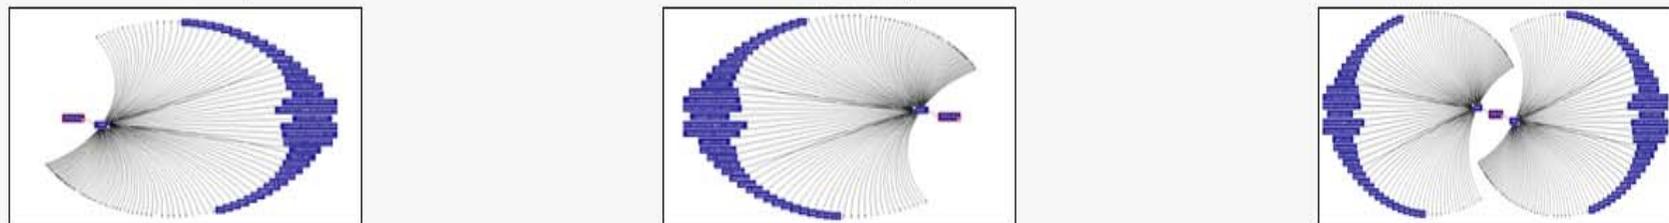

Use this screen to create a citation map for the record named in the title bar above (the target record) — you can map forward, backward, or both forward and backward citations for the target record — you can also select the depth or number of generations of citation to map

**Select Direction:**

Forward Only

Backward Only

Forward and Backward

Choose Forward to see records that cite the target record, choose Backward to see records the target record cites — to see both types, choose Forward and Backward

**Select Depth:** 1 Generation

Select the number of citation generations you want to see in the map you are creating — the records that directly cite or are directly cited by the target record are the first generation, records citing records that cite the target record and records cited by records cited by the target record are the second generation, etc.

**Warning:** Selecting 2 Generations may cause the map to time out due to the large numbers of records being retrieved. To improve performance when selecting 2 Generations select, Forward Only or Backward Only not both.

Cancel Create Map

Taskbar icons: Windows, Internet Explorer, Firefox, Chrome, Word, etc.

## Egyptian Universities' Libraries Consortia (EULC)

The major goal of the consortia is to provide interactive information services to the Egyptian scholars and students. All the consortia services are electronically available through the EULC portal. Accessing information resources and services through one unified portal would help the Egyptian universities' libraries to eliminate the overlap and duplication of resources and efforts, which would facilitate optimum methods for effectively and efficiently using the allocated resources

### EULC Projects

[1. Digital Library Consortia](#) — The main objective of this project is providing access to the international electronic resources including citations, abstracts and full text database; beside E-journals, books, transactions and engineering standards. All these E-resources are searchable through one unified portal and individually through their interfaces.

[2. Egyptian University Libraries Automation](#) — The objective of this project is automating the Egyptian universities' libraries, (EUL) through building a union catalog for their holdings. The union catalog will facilitate achieving more cooperation and resources sharing among all the members of the EULC.

[3. Future Library System Development](#) — The ICTC in EL-Mansoura and EL-Zagazig Universities have built and implemented a library automation system. The EULC cooperates with the ICTC to enhance and develop the system using an international list of specifications. The project objective is to standardize the system to cope with the international standards of library automated system and to generalize it in the automation of the EULC.

[4. The Electronic Theses and Dissertation Database](#) — The objective of this project is building a national database for the awarded theses and dissertation from the Egyptian universities, besides building a task force for the electronic theses and dissertations metadata standard (ETDMS) which would allow the higher education researchers a full submission of their theses to the system using an international electronic standard format.

### Resource of the Month

**Evidence-Based Medicine Reviews (EBMR)**  
A definitive resource for electronic information in the evidence based medicine (EBM) movement that combines 7 of the most trusted EBM resources into a single, fully-searchable database. EBMR helps clinicians practice EBM through a combination of resources that provide: systematic reviews of topics; article reviews; and access to definitive controlled trials. And only with EBMR on Ovid can you get comprehensive integration with MEDLINE.

ملخص:

ABSTRACT Recently, our capabilities of both generating and collecting data have been increasing rapidly. The wide spread use of bar codes for most commercial products, the computerization of many businesses and government transactions, and the advances in data collection tools has provided us with huge amounts of data. This explosive growth in data and databases has generated an urgent need for new techniques and tools that can intelligently and automatically transform the processed data into useful information and knowledge. Consequently, data mining has become a research area with increasing importance. knowledge discovery (or Data mining) systems are software systems extract nontrivial information (such as knowledge rules, constraints, and regularities), implied in data, previously unknown and potentially useful from data in databases. Sometimes, the term data mining is used to describe algorithms and methods that extract special types of patterns (such that Association Rules, Characteristic Rules, Discriminant Rules, Classification Rules, Clustering, Evolution, Deviations) from databases which is the central part of knowledge discovery process. But the term knowledge discovery is used to describe a collection of many processes, including, data collection, data preparation, data cleaning, data mining, and output representation. The discovered knowledge can be applied to information management, query processing, decision making, process control, and several emerging applications in information providing services, such as on-line services and World Wide Web. One of the most important knowledge extracted from database is the association rules. An example of association rules the statement: "90% of transactions that purchase bread and butter also purchase milk ". This association rule is represented in the form: bread, butter ? milk | 90%. The antecedent of this rule consists of bread and butter and the consequent consists of milk alone. The number 90% is the confidence factor of the rule. Specifically, given a database of sales transactions, one would like to discover all associations among items, such that the presence of some items in a transaction will imply the presence of other items in the same transaction. ما استخدم الكمبيوتر ، كان في التطبيقات الحسابية البسيطة : مثل نظم الأجر وسندات القبض Payroll Systems and Accounts Receivable ( ) . ثم استخدم الكمبيوتر في عمليات تفاعلية Transaction Processing ( ) ( أكثر تعقيدا وأكبر كثيرا من حيث كمية البيانات و العمليات : مثل أنظمة حجز و تنظيم رحلات الطيران ) Airline Reservations و أنظمة التحكم في التصنيع و التجارية وغيرها. هذا الكم الكبير من البيانات والمعلومات يحوي الأنظمة بكفاءة إلى بزوغ نظم إدارة قواعد البيانات DBMS حيث تقوم هذه النظم بتوجيه من المستخدم باستخراج المعلومات من قواعد البيانات . أخيرا - وفي بداية التسعينيات - أدى التقدم الكبير في تقنيات الكمبيوتر والبرمجيات والاتصالات ووسائل التخزين والاسترجاع إلى وجود كم هائل من البيانات والمعلومات لدى الشركات و الهيئات والمؤسسات العلمية و الحكومية والتجارية وغيرها. هذا الكم الكبير من البيانات والمعلومات يحوي معرفة مفيدة ؛ لكن نظم إدارة قواعد البيانات لا تستطيع استخلاصها ، كما أنها تفوق قدرات الإنسان على فهمها و تحليلها و استنباطها يدويا. في نفس هذا الوقت ؛ كانت هناك بحوث متقدمة في الذكاء الاصطناعي والإحصاء والمعلوماتية وبحوث العمليات و قواعد البيانات و الرياضيات ... مرتبطة بتحليل البيانات. كل هذا أدى إلى بزوغ نظم اكتشاف المعرفة من قواعد البيانات الكبيرة Knowledge Discovery Systems from Large Databases or KDD Systems ( ) . هذه النظم هي نظم برمجيات تقوم باكتشاف معلومات غير تافهة ، مضمنة في البيانات ، ذات فائدة محتملة وغير معروفة مسبقا. يتم ذلك بواسطة إجراء عدة عمليات متتالية على قواعد البيانات من هذه العمليات : جمع البيانات ذات الصلة ( Data Collection )
